

WEEE Directive

Effective from the 29th of July 2005 the Waste Electrical and Electronic Equipment Directive (WEEE Directive) was implemented to ensure producers and agents take responsibility for the reduction of electrical and electronic waste into landfill sites. Aquaform Inc. Sp. z o.o. is registered with the Chief Inspector of Environmental Protection to manage collection and disposal of electrical and electronic waste. The Aquaform registration number is WEEE/**E0002280WZ**.

Effective from the 1st of January 2009, the amendment to the WEEE Directive obliges the producer or agent to demonstrate the costs of waste management.

The waste management costs are only included for the products covered by the WEEE Directive.

The waste management costs include the actual costs of collection, treatment, recycling or non-recycling processes for the recovery and disposal of waste. They are part of the net price and are calculated into the price per product unit. The implementation of the statutory obligation by Aquaform Inc. Sp. z o.o. does not cause any change in the price of the products

Cost of waste management:

MANUFACTURER		Currency PLN
AQUAFORM	lighting fixture	0.45
OSRAM	fluorescent light sources	0.20
PHILIPS	fluorescent light sources	0.40
